

Parents,

Please make sure the following has been done daily before sending your child to school:

1. Check their temperature to ensure it is below 100.4°F.
2. Make sure they have their mask, student ID, planner, Chromebook, materials, and earbuds.
3. Students should bring a clear bottle of water or a clear container with water to drink since the water fountains will not be able to be used.

Note: If your student displays symptoms during the school day and needs to be sent to the isolation room, please have a plan to pick up your child from school.
